

## ALIGNMENT of WESTERN AUSTRALIAN *CALADENIA* NAMES (updated 23 January 2017)

**Andrew Brown**

The following table contains a comparative list of Western Australian *Caladenia* names used in the books *Orchids of Western Australia* 2008, *Orchids of South – West Australia 3<sup>RD</sup> Edition* 2011 and *Field Guide to the Orchids of Western Australia* 2013. For earlier books you can refer to *A Compilation of Western Australian Orchid Names* by Noel Clarke.

The object of this exercise is to align the phrase names used in these three publications with the current formal name.

As I am sure you are aware, the naming of plants is an evolving process and there will be further changes as new species are discovered and described.

### Acknowledgements

I would like to take this opportunity to thank Noel Clarke who originally came up with the idea that has led to the development of this comparative list.
